

The Science Society

Do you want more science in your life?

The Science Society is science club where students explore the world around us through experiments, challenges, and activities. We also get involved in Citizen Science and challenges to stay active in our science community.

The Science Society is a student run club, where the participants choose the content and the objectives to be met in the club. If you have something you want to explore, this is the club where you can do it.

Check out the fun in Mr. Landry's Room, 237, on Thursday mornings from 6:40 am to 7:25 am beginning October 22, 237.

The Science Society is open to any 7th and 8th grade student with a signed permission slip.

For Information, check out our website at
